PROFESSIONAL DEVELOPMENT CONSULTANT-SECONDARY MATHEMATICS

Agile Mind has an educator consulting opportunity to work in the capacity as an independent professional development contractor (Advisor) for a growing 6-12 education company.

Agile Mind is an education company that has pioneered the application of emerging technologies to transform the teaching and learning of mathematics and science in middle and high schools. For additional information about Agile Mind, our work and the research that supports it, please visit our website at www.agilemind.com.

As a contracted Advisor for **Agile Mind**, you will:

- Deliver protocol-driven professional development sessions for teachers and leaders in a variety of contexts, including at large scale regional training sessions for multiple partners during the summer (20% of the available work) and local and/or site-based training throughout the school year (80% of the available work).
- Perform consultative work with teachers and leaders during the academic year with Agile Mind partner schools and districts, including data analysis, collaborative planning, delivery of seminars, classroom coaching, delivery of demonstration lessons, classroom observations and providing feedback.
- Work in consultation with the Agile Mind team to develop solutions and intervention strategies that address implementation challenges, and make recommendations to district and school leaders to assure success.
- Serve as a model of excellence and research-based best practices for our partners through the design and delivery of high quality professional development experiences
- Maximize the beneficial use of Agile Mind services in the classroom to strengthen and expand partnerships with schools, districts, and states.
- Build relationships with teachers and leaders that foster success and collaboration.
- Provide consultation and reports to district and school leaders.
- Obtain appropriate Agile Mind certification to perform associated services as a contracted independent professional development consultant.
- Be available to attend a minimum of 20 work days during the school year.

MINIMUM QUALIFICATIONS

This position **requires** a Master's Degree in Education or related field; Incumbent must have **experience with secondary education with strong content knowledge in mathematics**. The applicant must have successful leadership and presentation/facilitation experience with adult learners.

SKILL REQUIREMENTS

This position requires the applicant to be knowledgeable in curriculum and instructional strategies in mathematics and social-emotional learning.

Applicant must have:

- Demonstrated success providing middle school/high school math instruction and should have experience with adolescent and/or adult learners.
- Experience working with school district leaders.
- Experience in the design and delivery of professional development.
- Excellent written and verbal communication skills.
- Availability to deliver professional development throughout the school year and during the summer.
- Availability for overnight travel for multiple day engagements with school districts.
- Residence within close proximity of a major metropolitan airport for travel within the US.

Note: This is contract work; you will be considered a contractor for tax purposes and responsible for filing your own 1099.
